

PRODUCT CODE: CS3027

PRODUCT NAME: CleanSpace™ HALO BIO Exhalation Filter

Description

The CleanSpace HALO BIO Exhalation Filter is suitable for use with the CleanSpace HALO. The Exhalation Filter does not contribute to the system's respiratory protection and must be used alongside either a CleanSpace HALO Particulate Filter (CS3022) or a CleanSpace HALO BIO Particulate Filter (CS3025). The Exhalation Filter is designed to filter the air exhaled by the wearer and consequently protects those not wearing a respiratory protection system. The Exhalation Filter should be changed if it has been contaminated with organic solvents (for instance isopropanol, xylene or toluene), if it has become visibly soiled or if it has passed its expiry date.

Note: The HALO BIO Exhalation Filter shall only be used in combination with a HALO Half Mask fitted with the CS3026 BIO Exhalation Valve Cover. It can be used with or without the CS3024 BioHood.

Features

- Used with the revolutionary CleanSpace HALO - A light weight PAPR with no hoses or belts.
- Materials: Nonwoven electrostatic media.
- Quickly and easily fitted and removed from the CS3026 BIO Exhalation Valve.
- Sold in a pack of 15

Specifications and materials

- Weight: 280g. Package Dimensions: 23cm x 15cm x 9cm
- Materials: Nonwoven electrostatic media.
- Storage and Use: -10°C to +55°C (-4°F to +131°F) at <90% relative humidity. Store away from direct sunlight, grease and oil.
- Cleaning: Do not clean, dispose of when a change of Exhalation Filter is required.
- Only to be used alongside a CleanSpace Particulate Filter. The BIO Exhalation Filter does not contribute to the system's respiratory protection.

Suitable Applications

Healthcare, pharmaceutical production, research, diagnostic laboratories and emergency responders. Suitable for protection against particulates including airborne biohazards.

Training

Online training available with verification for compliance purposes.

Limitations

CleanSpace respirators are air filtering, fan assisted positive pressure masks and designed to be worn in environments where there is sufficient oxygen to breathe safely. Do not use the CleanSpace in IDLH atmospheres, to protect against gases/vapours that cannot be filtered, or in Oxygen enriched or deficient atmospheres.
