1. Press the on button once to place the respirator in standby mode.

2. Place power unit behind your neck

3. Fasten the airclip on the left hand side

4. Put mask on your face and under your chin

5. Place harness on your head

6. Breathe to activate

7. Adjust the mask until you do not feel any leaks between the mask cushion and your face. It should sit level and feel comfortable.
