

THE REAL COST OF DISPOSABLES

ECONOMIC COST

- Purchasing – In excess of \$10/employee daily
- Reduced Productivity
- Waste Storage and Disposal
- Inventory Management and Storage

ENVIRONMENTAL COST – GLOBAL ISSUE OF TOO MUCH WASTE AND IMPROPER DISPOSAL

- High-income countries generate on average up to 0.5 kg of hazardous waste/hospital bed per day. Hospitals in the US produce more than 5.9 million tonnes of medical waste per year, which will escalate exponentially during an epidemic
- In 2015, a joint WHO/UNICEF assessment found that 40% of sampled facilities from 24 countries, had inadequate systems in place for the safe disposal of health care waste. Current options, such as open burning and incineration, landfill, or chemically treating waste, all have failings. The focus must be on reducing hospital waste to lessen the burden of disposal.

HUMAN COST

- During recent respiratory epidemics, there was a global shortage of disposable masks. *When staff are vulnerable to infection, this adversely affects attendance and patient care.*
- Disposable masks cause discomfort with improper fit, fogging and reduced visibility, heat stress and dizziness with rebreathed air and breathing resistance. *When staff are uncomfortable, productivity falls and patient care is affected.*

CleanSpace®

RESPIRATORS

RESPIRATORY PROTECTION THAT DOESN'T COST THE EARTH

A REVOLUTION IN RESPIRATORY PROTECTION

- Completely reusable, CleanSpace HALO
- Costs less to purchase than disposable masks over the course of a year
- Reduces waste disposal expenses
- Reduces the cost of inventory management and storage
- Is environmentally friendly

CLEANSPACE HALO IS COMFORTABLE TO WEAR INCREASING COMPLIANCE AND PRODUCTIVITY

- Compact and light-weight (<400g/0.9lb) with no heavy belts or hoses
- Delivers fresh cool air to the wearer with no fogging
- Clear silicon mask allows for added comfort and easy communication
- No breathing resistance with CleanSpace AirSensit® technology
- Donned in 10 seconds and easy to use

CLEANSPACE HALO IS THE SMARTEST OPTION FOR YOUR STAFF AND THE ENVIRONMENT

- ✓ High protection against biohazards – HEPA/P3 protection, 99.97% filtration efficiency for particles 0.3um and above
- ✓ NIOSH & CE Mark approved

Trial CleanSpace today, contact Customer Support to arrange a demonstration.
