

STERI-PLUS EXHALATION FILTER FOR SOURCE CONTROL

World's first exhalation valve filter for PAPR for source control.

Developed to filter the air exhaled by the wearer and consequently protects those not wearing a respiratory protection system.

FEATURES:

- Use with CleanSpace half masks
- Reusable case is compatible with standard disinfection/sterilization protocols
- Filtration efficiency 97% for particles 0.3µm and above
- Easy to fit. Easy to clean
- Cost effective
- Approved for use with all CleanSpace2 NIOSH Respirators

STERI-PLUS: HOW TO USE

STEP 1. Insert a new filter to the blue outer case.

Scan to watch the video

SUITABLE FOR APPLICATIONS WHERE FILTERING OF THE WEARER'S EXHALED AIR IS REQUIRED:

- Mining and quarry
- Metal fabrication and welding
- Chemical or biological material handling
- Stone, cement and concrete handling
- Maintenance and cleaning
- Food Processing and handling
- Grain and food handling

PARTS:

- Case: outer (polycarbonate) and inner case (ABS) (reusable)
- Filter media: nonwoven electrostatic (consumable)

STEP 2. Ensure filter tabs are positioned in the case slots to hold the filter in place.

STEP 3. Correctly place the white inner case over the filter (see image above). Align the end (A) to slot in and then close and clip the case shut (B).

STEP 4. Align the assembled case with filter to the mask exhalation cap so the outer case vents are at the bottom of the mask. Click the case onto the exhalation valve seat. NOTE: The exhalation valve cap can remain in place.

CODE PRODUCT NAME

CS3038 Steri-Plus Case: Exhalation valve filter case (reusable)

CS3039 Steri-Plus Filter: Exhalation valve filter (consumable) (Pk 20)
